

Prayagraj Lion Waste Management Pvt. Ltd. bags mega project on Solid Waste Management Services in the Iconic city of Prayagraj

~ The project will encompass services like door to door collection & transportation of municipal solid waste, user charge collection and mechanized cleaning of public toilets in the city, starting January 26th, 2021~

Prayagraj, January 26th, 2021: **Prayagraj Lion Waste Management Pvt. Ltd.**, has bagged a solid waste management project in the iconic city of Prayagraj, in a joint venture with Lion Services Limited, the flagship company of Global Excellence Group offering integrated municipal services and facilities management across India. The Project titled, Prayagraj Package-1 Door to Door collection and Transportation of Municipal Solid Waste Services, will encompass integrated services like door to door collection & transportation of municipal solid waste, user charge collection and mechanized cleaning of public toilets in the city area using modern technology.

Speaking on the occasion, **Sunil Singh, Chief Executive Officer, Lion Services Limited**, said “In furtherance to our vision of Swachh Bharat, we are elated to enter the vertical of Solid Waste Management with the iconic city of Prayagraj. The project kick-started with an extensive survey of the designated area, which helped us in understanding the on-ground challenges and needs of the local public. With GIS-mapping of the territory and ready deployment plans, we are well-equipped to serve the city by initiating our door-to-door waste collection services at full swing. This project is indeed a milestone in the company’s 52-year old legacy.”

The purpose of the Prayagraj Project is to collaborate with members of community and raise awareness about proper segregation of biodegradable and non-biodegradable waste at source as well as sensitizing the public and inculcating behavioural change towards sanitation and hygiene to achieve successful waste management. With over 52 years of rich industry experience, Lion Services Limited has been taking care of the city infrastructure and offering public utility maintenance services for local citizens in more than 9 cities across India. Through its joint venture with **Prayagraj Lion Waste Management Pvt. Ltd.**, the company aims to deliver the project with a process-driven, highly-transparent approach backed by state-of-the-art technology and GIS, GPS and VehicleVTMS monitoring of men and machines.

“Since proper waste management is critical in building a smart city, the focus will be on successfully achieving complete waste segregation at source and using modern day technology for organising and processing the cleaning work with precise monitoring.” he further added.

With ample support from Prayagraj Nagar Nigam, the project envisions taking the city a step closer to its dream of becoming one of the first cities in India to successfully achieve complete waste segregation at source.
